

ACCREVENT SOLUTIONS specializes in seamlessly integrating data, processes, and people across the entire product lifecycle. Our PLM, IoT, ALM and AI solutions ensure efficient and cost-effective management from ideation to disposal, setting us apart in the industry.

## Services Offering

### PLM Services

Our experts conduct a thorough PLM assessment, implement tailored solutions, manage data migration with our exclusive "Rover" framework, and provide ongoing application management for optimal operation.

### IoT Solutions

In the age of digital transformation, our IoT services empower businesses to enhance operational efficiencies and create a digital business with full implementation cycle.

### ALM Expertise

We bring Application Lifecycle Management expertise to the table, covering requirements, source code, testing, operation, and maintenance to ensure the seamless flow of your applications.

### Connected Engineering

Beyond PLM, we offer Connected Engineering services, creating integrated systems of record to optimize the development process for stakeholders.

### Our Expertise

Accrevent Solutions specializing in software innovation, we leverage the latest technologies to develop bespoke solutions tailored to your unique business needs.

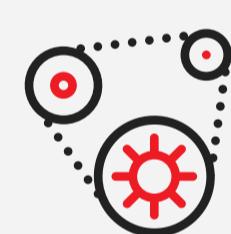

### AI Capabilities

We deliver smart AI solutions for data analytics, service automation, quality and logistics, and customized enterprise systems. With features like voice input and audio output, we ensure effortless engagement for all users.

## Accrevent at Glance

- HQ USA (MI), Delivery Center Pune, India, Singapore, South Africa, UAE
- 110+ Engineers with 10+ years of average experience
- 20+ Clients for engineers and IoT services
- 50 Million \$ Business impact delivered through Services
- 3+ Large deliveries with engineering & IT Services
- Products Industrial IoT solution - Connexus and Smartbear

## Accrevent center of excellence

### Engineering Services

PLM Implementations, maintenance, ALM, CAD Services, QA, Migration, Integrations, Support, Automation

### IoT Services

Smart connected devices to Manufacturing intelligence, Consulting to implementation Hardware to Software, Secured protocols to Cloud

### Data Analytics

Data Statistics, Data Lake, Data Science, Python, AI-ML, Power BI, Tableau

### Testing Services

Automation Testing, Performance Testing, API Testing, Web Application Testing

### Application Services

Software Development, Testing, IT Consulting Services, IT-Advisory Service, Resource Outsourcing Services

### Cloud Services

Software DevOps, Azure, AWS, Google, Kubernetes, Docker, Private Cloud

## About Accrevent

Accrevent core team benefits from a deep background in IT, IoT, enterprise apps implementation. Specialize in technologies and services that boost operational efficiency, improve collaboration and spark innovation.

Our experience in product delivery & industry knowledge provides unique perspective on software architectures and large software implementations.

Accrevent is an implementation partner for PTC, AWS, Oracle and Microsoft for their IoT, PLM and Cloud solutions.
